

RESPIRATORY PROTECTION

FFP2 FOLDABLE DUST-PROOF MASK WITH A VALVE

FFP2

PRODUCT FEATURES

MATERIAL: Multi-layered filtration material. Designed for work in conditions where the dispersed phase concentration does not exceed 10 x TLV. The foldable mask structure makes their storage easier. Multi-layered filtration material protects the respiratory system. Nose clip and polyurethane foam seal guarantee comfortable use. The valve facilitates air exhalation. The head straps made from braided rubber threads ensure perfect fit of the mask to the face. Head strap clips ensure smooth adjustment. **STANDARD:** EN 149.
